## Ordering Information

Catalog Number	"A" Bolt Type
7285ZA2299	5/16"-18 x 1-1/4"
7285ZA2399	5/16"-18 x 1"
7285ZA2599	3/8"-16 x 1-1/4"

Single Pole terminal board for use in single phase distribution transformers. The terminal block will mechanically and electrically secure the high voltage lead within the tank of the distribution transformer to;

- Help ensure lead routing for proper insulation between the high voltage and grounded objects.
- Hold the lead in place during manufacturing and when removing the tank cover to prevent damage within the coil should the high voltage lead be in tension.

Think of the ECI Terminal Board as an inexpensive insurance policy that helps prevent costly transformer damage and customer outages.
